Shipment & Equipment Monitoring

- 24 Hour Operations Center
- Real-Time Tracking/ Communications
- Multiple Systems & Methods
- Asset Utilization
- Monitoring Test Center

“Providing Comprehensive Solutions to Complex Transport and Disposal Needs”

VS constantly strives to provide safe, reliable and cost effective transport services to meet our client needs. Our specialty transport of RAM, hazmat, waste and classified materials for government and commercial nuclear organization has become well recognized in the industry for our performance.

VS is currently responsible for the safe shipment of TRU materials from various generator sites to the Waste Isolation Pilot Plant as a prime contractor to the Department of Energy in Carlsbad. We maintain 34 government furnished trailers, 15 VS owned tractors, and manage 26 dedicated and highly trained drivers currently for this project. VS also recently established a terminal for these operations in the Carlsbad, New Mexico area.

VS also recently complete the transport of nearly 5,000 shipments of DUF6 from Oak Ridge to Portsmouth, Ohio and ~ 2,000 shipments of containers carrying Silos 1 and 2 LLW from Fernald Ohio to be disposed of in Texas at Waste Control Specialists. From 2004-2006 VS shipped approximately 10,000 shipments, around 80% were government transport campaigns.
